1. Types of Courses

All CERTI courses are home study courses designed to provide you with quality education in convenient formats which can be completed at your pace and convenience. Unless otherwise indicated, all courses are available by download/streaming, with the option to have course materials also shipped to you.

1.1. Entry Level Courses

Entry level courses are designed to provide students with the required knowledge and techniques for obtaining the national certification recognized by non-regulated states and most regulated states. To become certified, individuals must successfully complete an approved entry level course, pass the national certification exam, and submit an application for certification with proof of course completion and a passing score on the national exam.

1.1.1. Entry Level Measurement

The Entry Level Measurement Course – “**Radon and Radon Decay Product Measurement**” is an approved entry level course for becoming certified in Measurement of Radon. This course is also a prerequisite for taking the entry level Radon Mitigation Course.

1.1.2. Entry Level Mitigation

The Entry Level Mitigation Course – “**Radon Mitigation Technology**” is an approved entry level course for becoming certified in the Mitigation of Radon (installation of systems for the reduction of radon levels). Since the Measurement Course is a prerequisite for this course, we offer an Expanded Version which includes both courses.

1.2. Continuing Education Courses

Certification is renewed every two years. A requirement for that renewal is completion of continuing education. Continuing Education (CE) requirements for the NEHA-NRPP certification are as follows:

1.2.1. One Certification – either Measurement or Mitigation – 16 Hours

- Must include at least 8 hours of Category I Credits (completion of approved Courses) – all of CERTI courses are approved for Category I credits for either Measurement or Mitigation.
- Up to 8 hours of Category II Credits are allowed – These can be obtained by attending radon conferences, giving radon presentations to the public – CERTI also provides free Category II Credits to registered students.

1.2.2. Two Certifications – both Measurement and Mitigation – 24 Hours

- Must include at least 16 hours of Category I Credits (completion of approved Courses) – all of CERTI courses are approved for Category I credits for either Measurement or Mitigation.
- Up to 8 hours of Category II Credits are allowed – These can be obtained by attending radon conferences, giving radon presentations to the public – CERTI also provides free Category II Credits to registered students.

1.3. CTP Designated Courses

CERTI has designated specific courses as **CTP – CERTI Trained Professionals**. These courses have very in-depth training and/or specialize in specific areas that distinguish radon professionals within the industry. Graduates of CTP courses are automatically listed on the site, with an abbreviated version of their profile available for viewing by the public. Graduates of courses designated with CTP logo are promoted on CERTI web site as having been distinguished with specialized training

2. Course Descriptions

2.1. Entry Level Certification Courses – United States

2.1.1. Measurement Entry Level - C-101

Course Name: Radon & Radon Decay Product Measurement

Cost: \$325 - Optional CD format add \$45 (includes shipping)

This course prepares you to conduct radon and radon decay product measurements. It is presented in a convenient and comprehensive format that allows you to listen to audio (downloadable MP3 format), review key points with the course manual, and reinforce information with online quizzes - *Not available in FL, IL, NJ, OH*

Course Includes:

- Course Manual
- Audio Interviews and Instruction
- Videos and Resources
- Online Quizzes
- Downloadable Course Certificate

2.1.2. Mitigation Entry Level – C-102

Course Name: Radon Mitigation Technology

Cost: \$475 - Optional CD format add \$45 (includes shipping)

(Approved entry level measurement course is a prerequisite)

Provides training for installation of radon mitigation systems in a convenient and comprehensive format that allows you to listen to audio (downloadable MP3 format), review key points with the course manual, and reinforce the information with online quizzes. You also receive “hands-on” field training with a mentor tailored to your experience and to fit

your needs - *Not available in FL, IL, IA, NJ, OH*

Course Includes:

- Course Manual
- Audio Interviews and Instruction
- Online Quizzes
- “hands-on” field experience with Mentor
- Downloadable Course Certificate

2.1.3. Mitigation Entry Level – Expanded Version – C-103

Course Names: Radon & Radon Decay Product Meas / Radon Mitigation Technology

Cost: \$695 -Optional CD format add \$55 (includes shipping)

The measurement and mitigation courses have been combined in one package at a significant discount. These courses provide all the training you need to become certified for both radon measurement and mitigation. Although you are not required to obtain the radon measurement certification to become certified in mitigation, the measurement course is a prerequisite to the mitigation course provides you with valuable working knowledge for your

radon business - *Not available in FL, IL, IA, NJ, OH*

Course Includes:

- Course Manual for each course
- Audio Interviews and Instruction
- Videos and Resources
- Online Quizzes for each course
- “hands-on” field experience with Mentor for Mitigation Course
- Downloadable Course Certificates

2.2. Entry Level Certification Courses – Canada

2.2.1. Measurement Entry Level - C-104

Course Name: Canada - Radon & Radon Decay Product Measurement

Cost: \$325

This course prepares you to conduct radon and radon decay product measurements in Canada. It is presented in a convenient and comprehensive format that allows you to listen to audio (downloadable MP3 format), review key points with the course manual, and reinforce information with online quizzes. This course was recently updated (February 2013) to comply with the Health Canada standards.

Course Includes:

- Course Manual
- Audio Interviews and Instruction
- Videos and Resources
- Online Quizzes
- Downloadable Course Certificate

2.2.2. Mitigation Entry Level – C-105

Course Name: Canada - Radon Mitigation Technology

Cost: \$475

(Approved entry level measurement course is a prerequisite)

Provides training for installation of radon mitigation systems in a convenient format that allows you to listen to audio (downloadable MP3 format), review key points with the course manual, and reinforce the information with online quizzes. You also receive “hands-on” field training with a mentor tailored to your experience and to fit your needs. This course was recently updated (February 2013) to comply with the Health Canada standards.

Course Includes:

- Course Manual
- Audio Interviews and Instruction
- Online Quizzes
- “hands-on” field experience with Mentor
- Downloadable Course Certificate

2.2.3. Mitigation Entry Level – Expanded Version – C-106

Course Names: Canada - Rn & RDP Meas / Canada - Rn Mitig Technology

Cost: \$695

The measurement and mitigation courses have been combined in one package at a significant discount. These courses provide all the training you need to become certified for both radon measurement and mitigation in Canada. Although you are not required to obtain the radon measurement certification to become certified in mitigation, the measurement course is a prerequisite to the mitigation course provides you with valuable working knowledge for your radon business. These courses were recently updated (February 2013) to comply with the Health Canada standards.

Course Includes:

- Course Manual for each course
- Audio Interviews and Instruction
- Videos and Resources
- Online Quizzes for each course
- “hands-on” field experience with Mentor for Mitigation Course
- Downloadable Course Certificates

2.3. Entry Level Certification Courses – Guam

2.3.1. Guam Entry Level Measurement – C-107

Cost: \$345

Includes two courses to prepare for certification to conduct radon measurements on Guam
National Measurement Course - Radon & Radon Decay Product Measurements

This entry level course approved by NEHA-NRPP prepares you to conduct radon and radon decay product measurements and to take the national NEHA-NRPP exam.

Course Includes:

- Audio interviews and instruction
- Online Videos and Resources and Course Manual
- Online Quizzes
- Downloadable Course Certificate

Guam Specific Measurement Course

This course is a supplement to the National radon measurement course and is required for being listed with the Guam EPA for conducting radon measurements on Guam.

Course includes:

- Downloadable Course Manual
- Audio and video clips which correspond to each page of the course manual
- Research Paper Reading Assignments & Downloadable Resource Materials
- Online Quizzes
- Downloadable Course Certificate

2.3.2. Guam Entry Level Mitigation – C108

Cost: \$750

Includes all four courses required to prepare you for certification to conduct radon measurements and mitigation on Guam.

- **National Measurement Course - Radon & Radon Decay Product Measurement**
- **Guam Specific Measurement Course** (see above)
- **National Mitigation Course - Radon Mitigation Technology**
- **Guam Specific Mitigation Course**

This entry level course approved by NEHA-NRPP prepares you to conduct radon mitigation and to take the national NEHA-NRPP exam.

Course Includes:

- Audio interviews and instruction
- Online Videos and Resources and Course Manual
- Online Quizzes
- "hands-on" field exercises with an instructor
- Downloadable Course Certificate

Guam Specific Mitigation Course

This course is a supplement to the national mitigation course and is required for being listed with the Guam EPA for conducting radon mitigations on Guam.

Course includes:

- Downloadable Course Manual
- Audio and video clips which correspond to each page of the course manual
- Research Paper Reading Assignments & Downloadable Resource Materials
- Online Quizzes
- Downloadable Course Certificate

2.4. Continuing Education Courses

2.4.1. Becoming Proficient with Rad Elec E-Perm – C-4-102 (NRPP 56)

Credits: 4

Cost: \$55 - Optional DVD format (+\$10 incl. shipping)

This home study course is an essential resource for any radon professional that is currently using or considering the use of the EPERM System in their business. This course was produced in conjunction with Rad Elec for the purpose of providing EPERM users with a thorough training to obtain the most benefit from this versatile and convenient measurement system.

Course Includes:

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.2. Radon from a Physician's Perspective – C-4-103 (NRPP 60)

Credits: 4

Cost: \$55 - Optional DVD format (+\$10 incl. shipping)

CERTI is proud to partner with the Center of Osteopathic Education and Research of the Colorado Springs Osteopathic Foundation to produce this unique course. This round-table discussion by radon subject matter experts and Doctors of Osteopathy contains mini-presentations by subject matter experts with questions asked from other panelists of a nature that are of interest to medical professionals as well as radon professionals and concerned citizens.

Course Includes:

- Video
- Online Quizzes
- Downloadable Course Certificate

2.4.3. Interviews with Radon Experts – C-4-104 (NRPP 62)

Credits: 4

Cost: \$55 - Optional DVD format (+\$10 incl. shipping)

This audio-based home study course provides you with an easy-to-use format of audio CD's in an easy-listening format including phone interviews with respected experts in the field providing valuable information and insight to the radon industry.

Course Includes:

- Audio
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.4. Radon Control Methods – C-4-105 (NRPP 65)

Credits: 4
Cost: \$55 - Optional DVD format (+\$10 incl. shipping)

This video based program, created in 2007, reviews standard radon mitigation techniques for both new and existing homes in relation to elements of the International Residential and International Mechanical Code. The program was videotaped as part of an ICC Chapter meeting where comments were provided from practicing building code officials.

Course Includes:

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.5. Canadian Radon Program – Measurement C-4-106 (NRPP 190 / C-NRPP 1001)

Credits: 4
Cost: \$55 - Optional DVD format (+\$10 incl. shipping)

This home study course provides you with a comparison of the radon measurement standards and protocols between the US and Canadian Radon Program, including the differences in Units of Measure, Consumer Guidance, and treatment of large buildings. This course is appropriate for all Canada Measurement and Mitigation professionals as well as US radon professionals with an interest in understanding the differences in the protocols.

Course Includes:

- Audio over PowerPoint
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.6. RRNC Practices: Industry Discussion of Current Approaches to Rn Control – C-8-101 (NRPP 135)

Credits: 8
Cost: \$110 - Optional DVD format (+\$10 incl. shipping)

This video-based course is comprised of two separate sessions recorded at the U.S. EPA, Region VIII's Radon Stakeholder's Meeting in Denver Colorado in April 2010. This program discusses current practices and an alternative to the installation of radon control techniques in building construction and incorporates valuable comments from seasoned mitigation contractors, engineers and school maintenance personnel who attended this highly interactive program.

Course Includes:

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.7. Health Perspectives for Promoting RRNC – C-8-102 (NRPP 136)

Credits: 8
Cost: \$110 - Optional DVD format (+\$10 incl. shipping)

This video-based course was recorded at the 2010 Region 8 Stakeholders Meeting and includes presentations by Dr. Bill Field, Phil Jalbert of US EPA, and Doug Kladder, all dealing with perspectives of health effects of radon in the promotion of Radon Resistant New Construction.

Course Includes:

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.8. Health Perspectives for Promoting RRNC – C-8-103 (NRPP 135/136-PA)

Credits: 8
Cost: \$110 - Optional DVD format (+\$10 incl. shipping)

This video-based course is comprised of sessions recorded at an EPA, Region VIII's Radon Stakeholder's Meeting in April 2010. It includes presentations by Dr. Bill Field, Phil Jalbert of US EPA, and Doug Kladder as well as a discussion with seasoned mitigation contractors, engineers and school maintenance personnel regarding current practices and alternatives to the installation of radon control techniques in building construction. This course is a combined abbreviated version of NRPP 135 and 136 (If you have taken NRPP 135 or 136,

NEHA NRPP will consider this a repeat of those courses)

Course Includes:

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.9. Design and Installation of Radon and Soil Gas Collection Systems – C-8-104 (NRPP 171)

Credits: 8
Cost: \$110 - Optional DVD format (+\$10 incl. shipping)

This video-based program was recorded at the 2012 Region 8 Stakeholders Meeting. The course includes the various design elements of soil gas collection systems for both radon and vapor intrusion, as well as a review of various standards of practice that may apply with a discussion on pros and cons of alternative approaches.

Course Includes:

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.10. Canadian Radon Program - Mitigation – C-8-105 (NRPP 191 / C-NRPP 1002)

Credits: 8

Cost: \$110 - Optional DVD format (+\$10 incl. shipping)

This course includes a comparison of the radon mitigation standards and protocols between the US and Canadian Radon Program, including the differences in fan locations, discharge points, and consumer recommendations. This course is appropriate for Canadian Radon Measurement and Mitigation professionals as well as US radon professionals interested in understanding the Canadian protocols.

Course Includes:

- Audio over PowerPoint
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.11. Radon Entry & Meas in Tropical Climate – C-12-102 (NRPP 110)

Credits: 12

Cost: \$155 - Optional DVD format (+\$20 incl. shipping)

This video and audio-based course deals with pressure driven entry of radon due to environmental factors found in structures constructed on karst or limestone formations as well as the effects of very tight buildings within tropical regions.

Course Includes:

- Audio and Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.12. Radon: Train the Speaker – C-12-101 (NRPP 1A)

Credits: 12

Cost: \$205 - Optional DVD format (+\$20 incl. shipping)

Enhance your business by providing real estate professionals, builders, or concerned citizens with professional presentations about radon. This course provides you with a PowerPoint Presentation that you can use (and adapt) for your own presentations as well as a full technical review for each slide to provide you with answers for typical questions and concerns from audiences. You also receive a comprehensive review of presentation techniques to enhance your skills as a public speaker. Students completing this course are eligible to be

listed on the Radon Speakers Bureau on the NEHA-NRPP and CERTI Websites.

Course Includes:

- Audio and Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate
- Listing on NEHA-NRPP and CERTI Speakers Bureau

2.4.13. Radon: Train the Speaker - NRPP 1A AND Your Choice of 4 CE Course C-16-107

Credits: 16

Cost: \$235 - Optional DVD format (+\$30 incl. shipping)

The popular Train the Speaker course is now also available with your choice of any 4 CE credit course for a total of 16 CE credits. The Train the Speaker course provides you with a PowerPoint Presentation that you can use (and adapt) for your own presentations as well as a full technical review for each slide to provide you with answers for typical questions and concerns from audiences. Students completing this course are eligible to be listed on the Radon Speakers Bureau on the NEHA-NRPP and CERTI Websites.

Plus your choice of one of the following courses:

- *Becoming Proficient with Rad Elec E-Perm (NRPP 56)*
- *Radon from a Physician's Perspective (NRPP 60)*
- *Interviews with Radon Experts (NRPP 62)*
- *Radon Control Methods (NRPP 65)*
- *Canadian Radon Program – Measurement (NRPP 190)*

2.4.14. Protecting Your Home From Radon – C-16-101 (NRPP 3)

Credits: 16

Cost: \$235 - Book is shipped to you (cost includes shipping)

This home study course is based upon the popular reference book, "Protecting Your Home From Radon." It provides radon professionals with the homeowner's perspective when it comes to radon mitigation. Whether you are a radon measurement or mitigation professional, this course will provide you with a valuable resource you may find yourself sharing with your clients.

Course Includes:

- Book: "Protecting Your Home From Radon"
- Online Quizzes
- Downloadable Course Certificate

2.4.15. Radon & Radon Decay Product Measurement – 16 CE – C-16-102 (NRPP 45B)

Credits: 16

Cost: \$225 - Optional DVD format (+\$20 incl. shipping)

This home study course provides you with all the comprehensive information and audio instruction of the Home Study Measurement Certification Course, but with an abbreviated set of review questions. Students listen to the audio CDs and complete the online review questions.

Course Includes:

- Audio
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.16. Radon Mitigation Technology – 16 CE – C-16-103 (NRPP 59B)

Credits: 16

Cost: \$225 - Optional DVD format (+\$20 incl. shipping)

This home study course provides you with all the comprehensive information and audio instruction of the Home Study Mitigation Certification Course, but with an abbreviated set of review questions. Students listen to the audio CDs and complete the online review questions.

Course Includes:

- Audio
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.17. Radon Meas & Mitig in Tropical Climate – C16-104 (NRPP 111)

Credits: 16

Cost: \$225 - Optional DVD format (+\$20 incl. shipping)

This audio and video based home study course is an extension of NRPP 110 - providing radon professionals with technical information and an overview of experiences in the measurement and mitigation of radon in tropical and karst conditions, including the differences involved in radon entry and effects of geologic formations.

Course Includes:

- Audio and Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.18. The Basis for Promoting Radon Reduction in Your Community – C-16-105 (NRPP 138)

Credits: 16

Cost: \$225 - Optional DVD format (+\$20 incl. shipping)

This video-based course was recorded over a three day period in Washington DC, this program provides a comprehensive review of the "Why's" and "How-To's" of radon control techniques in new and existing homes. These video based presentations were presented by the nation's leading experts on radon health risk, mitigation techniques, as well as legal aspects and social marketing strategies.

Course Includes:

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.19. Conducting Radon Surveys in Schools & Large Buildings – C16-106 (NRPP 153)**Credits:** 16**Cost:** \$245 - Optional DVD format (+\$20 incl. shipping)

This video course provides an in-depth discussion on conducting surveys in schools and large buildings and provides resources and tools in order to conduct surveys. Students also receive a copy of the new *AARST Protocol for Conducting Radon and Radon Decay Product Measurements in Multifamily Buildings* (\$40 value).

Course Includes:

- Video
- Course Manual
- Online Quizzes
- Tools and Resources for conducting Surveys
- *AARST Protocol for Conducting Radon and RDP Measurements in Multifamily Buildings*
- Downloadable Course Certificate

2.4.20. Radon & Radon Decay Product Measurement – 24 CE – C24-101 (NRPP 45A)**Credits:** 24**Cost:** \$325 - Optional DVD format (+\$20 incl. shipping)

This home study course includes all the comprehensive information and audio instruction of the Home Study Measurement Certification Course with a convenient alternative for obtaining all 24 credits required when you have both certifications. Students listen to the audio CDs and complete the online review questions.

Course Includes:

- Audio
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

2.4.21. Radon Mitigation Technology – 24 CE – C24-102 (NRPP 59A)**Credits:** 24**Cost:** \$325 - Optional DVD format (+\$20 incl. shipping)

This home study course includes all the comprehensive information and audio CD's of the Home Study Mitigation Certification Course with a convenient alternative for obtaining all 24 credits required when you have both certifications. Students listen to the audio CDs and complete the online review questions.

Course Includes:

- Audio
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

3. Do-It-Yourself Book

3.1. Protecting Your Home From Radon (2nd Edition)

Cost: \$35 - Includes Shipping by Priority Mail (Continental US)

The first edition of this book was written in 1993, to assist what was thought to be an occasional do-it-yourself homeowner. In reality, the number of individuals wanting to reduce radon levels themselves was much higher than anticipated.. The overwhelming success of the book led to the distribution of thousands of copies to individuals and libraries. Its popularity identified the need to address the process of hiring contractors and installing passive and active systems in new home construction.

The second edition has these two substantive additions. This detailed manual describes the most common methods for reliably reducing radon in a home. Written in a non-technical format, the book includes step-by-step instructions and illustrations to guide homeowners through the radon mitigation process.

4. Contact Us

If you have questions about your course or anything concerning the site, we encourage you to contact us directly either by phone or email. Our office hours are Monday through Friday 9AM – 5PM (Mountain Time).
