## 1. Types of Courses

All CERTI courses are online home study courses designed to provide you with quality education in convenient formats which can be completed at your pace and convenience. Unless otherwise indicated, all courses are available by download/streaming, with the option to have course materials also shipped to you.

### 1.1. Entry Level Courses

Entry level courses are designed to provide students with the required knowledge and techniques for obtaining the national certification. To become certified, individuals must successfully complete an approved entry level course, pass the national certification exam, and submit an application for certification with proof of course completion and a passing score on the national exam.

#### 1.1.1. Entry Level Measurement

The Entry Level Measurement Course – “**C-104 - Radon Measurement Course - Canada**” is an approved entry level course for becoming certified in Measurement of Radon. This course is also a prerequisite for taking the entry level Radon Mitigation Course.

#### 1.1.2. Entry Level Mitigation

The Entry Level Mitigation Course – “**C-105 - Radon Mitigation Course - Canada**” is an approved entry level course for becoming certified in the Mitigation of Radon (installation of systems for the reduction of radon levels). Since the Measurement Course is a prerequisite for this course, we offer a bundled discount to purchase both together (C-106).

### 1.2. Continuing Education Courses

Certification is renewed every two years. A requirement for that renewal is completion of continuing education. Continuing Education (CE) requirements for the C-NRPP certification are as follows:

#### 1.2.1. One Certification – either Measurement or Mitigation – 16 Hours

- Must include at least 8 hours of Category I Credits (completion of approved Courses) – all of CERTI courses are approved for Category I credits for either Measurement or Mitigation.
- Up to 8 hours of Category II Credits are allowed – These can be obtained by attending radon conferences, giving radon presentations to the public – CERTI also provides free Category II Credits to registered students.

#### 1.2.2. Two Certifications – both Measurement and Mitigation – 24 Hours

- Must include at least 16 hours of Category I Credits (completion of approved Courses) – all of CERTI courses are approved for Category I credits for either Measurement or Mitigation.
- Up to 8 hours of Category II Credits are allowed – These can be obtained by attending radon conferences, giving radon presentations to the public – CERTI also provides free Category II Credits to registered students.

## 2. Course Descriptions

### 2.1. Entry Level Certification Courses – Canada

#### 2.1.1. C-104 - Measurement Entry Level - Canada - Radon & Radon Decay Product Measurement

**Cost: \$325**

The course consists of a professionally edited classroom session complete with lectures from Canadian radon professionals focusing on Canadian protocols and challenges (approximately 20 hours of coursework). As a recorded classroom session you will also benefit from audience questions and explanations. You will enjoy this 100% Canadian program that was created in conjunction with the Canadian Cancer Society. And if you want to become certified in Radon Mitigation, this course provides

the foundation and is the prerequisite to that course.

**Course Includes:**

- Course Manual
- Video Instruction
- Downloadable Resources
- Online Quizzes
- Downloadable Course Certificate

#### 2.1.2. C-105 - Mitigation Entry Level - Canada - Radon Mitigation Technology

**Cost: \$475**

(Approved entry level measurement course is a prerequisite)

The course contains many educational elements to assist you -- Recording of live classroom session combining presentation slides, lecture and audience interaction - Online quizzes to assess and reinforce your command of the subject matter - Access to model contract documents and radon publications - Hands-on experience with the Canadian National Radon Training Centers lead trainers - Technical support with

those thorny radon challenges well after you have completed the course.

**Course Includes:**

- Course Manual
- Audio Interviews and Instruction
- Online Quizzes
- “hands-on” field experience with Mentor
- Downloadable Course Certificate

#### 2.1.3. Bundled – Measurement & Mitigation Courses listed above

**Cost: \$695**

The measurement and mitigation courses have been combined in one package at a significant discount. These courses provide all the training you need to become certified for both radon measurement and mitigation in Canada.

**Course Includes:**

- Course Manual for each course
- Audio Interviews and Instruction
- Videos and Resources
- Online Quizzes for each course
- “hands-on” field experience with Mentor for Mitigation Course
- Downloadable Course Certificates

## 2.2. Continuing Education Courses

### 2.2.1. C-4-102 - Becoming Proficient with Rad Elec E-Perm (CERTI-306 / NRPP 56)

**Credits:** 4

**Cost:** \$55

This home study course is an essential resource for any radon professional that is currently using or considering the use of the EPERM System in their business. This course was produced in conjunction with Rad Elec for the purpose of providing EPERM users with a thorough training to obtain the most benefit from this versatile and convenient measurement system.

**Course Includes:**

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

### 2.2.2. C-4-103 - Radon from a Physician's Perspective (CERTI-309 / NRPP 60)

**Credits:** 4

**Cost:** \$55

CERTI is proud to partner with the Center of Osteopathic Education and Research of the Colorado Springs Osteopathic Foundation to produce this unique course. This round-table discussion by radon subject matter experts and Doctors of Osteopathy contains mini-presentations by subject matter experts with questions asked from other panelists of a nature that are of interest to

medical professionals as well as radon professionals and concerned citizens.

**Course Includes:**

- Video
- Online Quizzes
- Downloadable Course Certificate

### 2.2.3. C-4-104 - Interviews with Radon Experts (CERTI-310 / NRPP 62)

**Credits:** 4

**Cost:** \$55

This audio-based home study course provides you with an easy-to-use format of audio CD's in an easy-listening format including phone interviews with respected experts in the field providing valuable information and insight to the radon industry.

**Course Includes:**

- Audio
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

#### 2.2.4. C-4-105 - Radon Control Methods (CERTI-311 / NRPP 65)

**Credits:** 4  
**Cost:** \$55

This video based program, created in 2007, reviews standard radon mitigation techniques for both new and existing homes in relation to elements of the International Residential and International Mechanical Code. The program was videotaped as part of an ICC Chapter meeting where comments were provided from practicing building code officials.

**Course Includes:**

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

#### 2.2.5. C-4-106 - Canadian Radon Program – Measurement (CERTI-319 / NRPP 190)

**Credits:** 4  
**Cost:** \$55

This home study course provides you with a comparison of the radon measurement standards and protocols between the US and Canadian Radon Program, including the differences in Units of Measure, Consumer Guidance, and treatment of large buildings. This course is appropriate for all Canada Measurement and Mitigation professionals as well as US radon professionals with an interest in understanding the differences in the protocols.

**Course Includes:**

- Audio over PowerPoint
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

#### 2.2.6. C-4-107 – Radon: Train the Speaker - Canada (C-NRPP 1009)

**Credits:** 4  
**Cost:** \$55

This four hour course will assist the radon professional in delivering meaningful presentations to homeowners, real estate professionals, home builders, lenders — you name it. Getting out and providing short presentations on radon is a great way to increase public awareness and a great way to present yourself as a radon professional to potential clients. However, there are some pitfalls that you can easily fall into, which is why this course can help you.

**Course Includes:**

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

### 2.2.7. C-4-108 – Radon Measurements in Schools and Large Buildings (C-NRPP 1008)

**Credits:** 4  
**Cost:** \$55

This 4 hour course expands the radon measurement professional's skills beyond testing residential structures to be able to take advantage of the expanding market of conducting surveys in large buildings such as schools and apartment buildings. Testing large buildings entails a lot more than taking using more test devices. It is necessary to be able to convey to the client why multiple locations need to be tested; be able to implement communication plans for occupants; and to understand special approaches to interpreting results to provide the best value to the client while shielding you from downstream liabilities..

**Course Includes:**

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

### 2.2.8. C-4-110 – Addressing Radon Decay Products – Another Tool in the Tool Box (C-NRPP 1011)

**Credits:** 4  
**Cost:** \$55

This course explores from a practical standpoint how radon decay products are measured and how RDP reduction can enhance soil gas remediation by reducing radon risks to very low levels. This course was presented at the request of the Canadian Association of Radon Scientists and Technologists at its Annual Meeting in Banff, Alberta on April 23, 2017. Although provided to a Canadian audience it has application for radon professionals around the world.

**Course Includes:**

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

### 2.2.9. C-4-111 – Advanced Diagnostics – Pressures and Air Flows (C-NRPP 1017)

**Credits:** 4  
**Cost:** \$55

In this course Colin Dumais reviews different methods and tools for measuring differential pressures and air flows during the design or post-mitigation phase. In addition there is a great demonstration on how stack effect works. This video based program was recorded with a live audience in Banff Canada during the 2017 CARST Radon Conference. Viewers will not only enjoy the lecture and demonstrations, but also benefit from audience questions.

**Course Includes:**

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

**2.2.10. C-8-101 - RRNC Practices: Industry Discussion of Approaches to Rn Control (CERTI-501 / NRPP 135)****Credits: 8****Cost: \$110**

This video-based course is comprised of two separate sessions recorded at the U.S. EPA, Region VIII's Radon Stakeholder's Meeting in Denver Colorado in April 2010. This program discusses current practices and an alternative to the installation of radon control techniques in building construction and incorporates valuable comments from seasoned mitigation contractors, engineers and school maintenance personnel who attended this highly interactive program.

**Course Includes:**

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

**2.2.11. C-8-102 - Health Perspectives for Promoting RRNC (CERTI-501 / NRPP 136)****Credits: 8****Cost: \$110**

This video-based course was recorded at the 2010 Region 8 Stakeholders Meeting and includes presentations by Dr. Bill Field, Phil Jalbert of US EPA, and Doug Kladder, all dealing with perspectives of health effects of radon in the promotion of Radon Resistant New Construction.

**Course Includes:**

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

**2.2.12. C-8-103 – RRNC Practices & Health Perspectives for Promoting RRNC (CERTI-502 / NRPP 135/136)****Credits: 8****Cost: \$110**

This video-based course is comprised of sessions recorded at an EPA, Region VIII's Radon Stakeholder's Meeting in April 2010. It includes presentations by Dr. Bill Field, Phil Jalbert of US EPA, and Doug Kladder as well as a discussion with seasoned mitigation contractors, engineers and school maintenance personnel regarding current practices and alternatives to the installation of radon control techniques. It is a combined abbreviated version of NRPP 135 and 136 (If you have taken NRPP 135 or 136, NRPP will consider this a repeat course)

**Course Includes:**

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

### 2.2.13. C-8-104 - Design and Installation of Radon and Soil Gas Collection Systems (CERTI-316 / NRPP 171)

**Credits:** 8  
**Cost:** \$110

This video-based program was recorded at the 2012 Region 8 Stakeholders Meeting. The course includes the various design elements of soil gas collection systems for both radon and vapor intrusion, as well as a review of various standards of practice that may apply with a discussion on pros and cons of alternative approaches.

#### Course Includes:

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

### 2.2.14. C-8-105 - Canadian Radon Program - Mitigation (CERTI-320 / NRPP 191)

**Credits:** 8  
**Cost:** \$110

This course includes a comparison of the radon mitigation standards and protocols between the US and Canadian Radon Program, including the differences in fan locations, discharge points, and consumer recommendations. This course is appropriate for Canadian Radon Measurement and Mitigation professionals as well as US radon professionals interested in understanding the Canadian protocols.

#### Course Includes:

- Audio over PowerPoint
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

### 2.2.15. C-12-103 - Advanced Rn Meas for Multi-Family and Other Large Buildings (CERTI-601)

**Credits:** 12  
**Cost:** \$155

Using both US EPA protocols and the newly created AARST Multi-Family Measurement protocols, students completing this course will have the tools to expand their radon measurement into this growing segment of the radon industry. The skills taught in this course also apply for those wishing to test schools and administrative buildings. Students have access to survey tools such as test logs, testing notices and other resources to help enter this market. This course has been approved by NRPP as a prerequisite to the Advanced MF Measurement Exam.

#### Course Includes:

- Video
- Course Manual
- AARST/ANSI Protocols
- Online Quizzes
- Downloadable Course Certificate

**2.2.16. C-16-102 - Radon & Radon Decay Product Measurement – 16 CE (CERTI-305 / NRPP 45B)**

**Credits:** 16  
**Cost:** \$225

This home study course provides you with all the comprehensive information and audio instruction of the Home Study Measurement Certification Course, but with an abbreviated set of review questions. Students listen to the audio CDs and complete the online review questions.

**Course Includes:**

- Audio
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

**2.2.17. C-16-103 - Radon Mitigation Technology – 16 CE (CERTI-308 / NRPP 59B)**

**Credits:** 16  
**Cost:** \$225

This home study course provides you with all the comprehensive information and audio instruction of the Home Study Mitigation Certification Course, but with an abbreviated set of review questions. Students listen to the audio CDs and complete the online review questions.

**Course Includes:**

- Audio
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

**2.2.18. C-16-105 - The Basis for Promoting Radon Reduction in Your Community (CERTI-314 / NRPP 138)**

**Credits:** 16  
**Cost:** \$225

This video-based course was recorded over a three day period in Washington DC, this program provides a comprehensive review of the "Why's" and "How-To's" of radon control techniques in new and existing homes. These video based presentations were presented by the nation's leading experts on radon health risk, mitigation techniques, as well as legal aspects and social marketing strategies.

**Course Includes:**

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

**2.2.19. C-16-106 - Conducting Radon Surveys in Schools & Large Buildings (CERTI-315 / NRPP 153)**

**Credits:** 16  
**Cost:** \$245

This video course provides an in-depth discussion on conducting surveys in schools and large buildings and provides resources and tools in order to conduct surveys. Students also receive a copy of the new *AARST Protocol for Conducting Radon and Radon Decay Product Measurements in Multifamily Buildings* (\$40 value).

**Course Includes:**

- Video
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

**2.2.20. C-24-101 - Radon & Radon Decay Product Measurement – 24 CE (CERTI-304 / NRPP 45A)**

**Credits:** 24  
**Cost:** \$325

This home study course includes all the comprehensive information and audio instruction of the Home Study Measurement Certification Course with a convenient alternative for obtaining all 24 credits required when you have both certifications. Students listen to the audio CDs and complete the online review questions.

**Course Includes:**

- Audio
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

**2.2.21. C-24-102 - Radon Mitigation Technology – 24 CE (CERTI-307 / NRPP 59A)**

**Credits:** 24  
**Cost:** \$325

This home study course includes all the comprehensive information and audio CD's of the Home Study Mitigation Certification Course with a convenient alternative for obtaining all 24 credits required when you have both certifications. Students listen to the audio CDs and complete the online review questions.

**Course Includes:**

- Audio
- Course Manual
- Online Quizzes
- Downloadable Course Certificate

**3. Contact Us**

If you have questions about your course or anything concerning the site, we encourage you to contact us directly either by phone or email. Our office hours are Monday through Friday 7:30AM to 4:30PM (MST).

Phone: - 719-632-1215 / Email: Denise Brown – [dbrown@certi.us](mailto:dbrown@certi.us) / Doug Kladder – [dkladder@certi.us](mailto:dkladder@certi.us)
