Legend

-  Zone 1 Highest Potential (greater than 4 pCi/L)
-  Zone 2 Moderate Potential (from 2 to 4 pCi/L)
-  Zone 3 Low Potential (less than 2 pCi/L)

Radon in Schools Program

Our Radon In Schools Program tested about 17% of the state-supported schools (163 of 950 schools). The initial results of this program indicated about 2.3% of the schools screened had radon concentrations of 4pCi/L or above (the EPA-recommended limit). Later testing in those schools produced no results of 4pCi/L or above. The Radon in Schools Program is now concentrating on screening all schools within the school districts that produced results of 4pCi/L or greater during the initial screening of that district.

Mississippi Radon Fact Sheet

Mississippi Enacted Legislation

Mississippi Code §§ 89-1-501—523: Requires written disclosure of the condition of real property consisting of up to four dwelling units, when property is transferred with the aid of real estate brokers or salespersons. Property Condition Disclosure Statement adopted under the law requires the disclosure of problems which may exist on the property, including hazardous or toxic waste, asbestos, lead based paint, formaldehyde insulation, radon gas, and mold. (Disclosure Statement available at http://www.mrec.ms.gov/docs/mrec_forms_property_condition_disclosure_statement.pdf.)
